Education

University of Colombo
School of Computing

May 2022 – Present

Kularathne College,
Ambalangoda

2006 – 2019

Skills

Languages and Tools

HTML, CSS, JavaScript, C, C++,
Python, Java, PHP, MySQL,
PostgreSQL

Frameworks & Libraries

React, Spring Boot, Laravel, Vue

Soft Skills

Leadership, Teamwork, Problem-
Solving, Communication

About Me

I am a third-year Computer Science student at UCSC with a passion for using technology to solve real-world problems. In addition to my technical interests, I enjoy playing basketball, which has strengthened my teamwork, leadership, and problem-solving skills. Through hands-on experience in full-stack development, I have worked on various projects that prepared me to contribute effectively to a team. I am a quick learner who stays updated with current trends and performs well in both team and individual environments.

Projects

WeBuild

2023 – 2024

Tools & Technologies: PHP, MySQL, HTML, CSS, JavaScript, jQuery

- Features efficient house model choosing and work management.
- Provides payment services and scheduling.
- Implements search filters and automated worker allocation
- Developed robust backend management and user-friendly interfaces.
- Enhanced privacy with user access controls and improved construction management.

StudyHive

2024 – 2025

Tools & Technologies: Spring Boot, React.js, PostgreSQL, Zegocloud, Firebase, REST APIs

- StudyHive is a comprehensive platform for collaborative learning.
- It features advanced search filters and matchmaking algorithms.
- Users can organize study groups, engage in video calls, and use online chat.
- The platform also provides a leaderboard to foster competition and track student progress.

Library Management System

2023 – 2024

Tools & Technologies: Vue, Laravel, Tailwind CSS

- A web-based application for managing library systems.
- Integrates staff and members effectively and features role-based authentication and authorization.
- Supports CRUD operations for various user roles with real-time updates and secure access.
- Key features include real-time updates, secure access, and role-specific dashboards.
- Users can reserve books, leave reviews, receive notifications, filter options and post new details.

Honors and Awards

OpenHack 2.0 – 6th Place
Mozilla Campus Club of IIT
(Team MuggleCoders)
Feb 2023

Interests

Software Engineering
Competitive Programming
Full Stack Development
Front-End Development

Sports Achievements

Sri Lanka University Sports
Colors (SLUSA)
Basketball
2022

University Sports Colors
(UOC)
Basketball
2022, 2023

Best Player Award (UOC)
Basketball
2023

Portfolio 2024 – 2025

Tools & Technologies: React.js, Framer Motion

BioMark 2023 – 2024

Tools & Technologies: Flutter, Firebase

- A mobile application designed for bio-data collection to support research initiatives.
- Allows users to add bio-data as volunteers without registration.
- Registered users can securely log in to add both bio-data and personal information.
- Key features include user authentication and secure data handling.
- Additionally, the app provides easy data input for both volunteers and registered users.

Volunteering and Positions of Responsibility

Vice Captain (UOC) 2024
Basketball

Member of Amalgamated Club 2024
